Hello Michael,

At the invitation of Lon Kissinger and Katherine Brown I read the Seldovia report with interest. It was a very ambitious and admirable undertaking for this collection of villages. Quite amazing, actually.

I feel that the data and results will be valuable as the various stakeholders try to work out some environmental standards. I also feel that the report could use a revision on some of the statistical methodology and on presentation of results (writing and displays)--before the report is officially released.

Perhaps it would be good to have a teleconference together, including any of the cc people here who wish to participate. We could go over the report in that call.

Your thoughts? If you don't mind, you could reply with your contact information.

Thank you for the opportunity to review the report.

Best wishes,

Nayak

P.S. I am attaching my CV.
